Beaches and coves

Los Muertos beach

Between Carboneras and Agua Amarga. It has a rather difficult access, it is a small beach of about 100 m long and about 40 m and has a little more than 1 km to the left. Little or no park land to the road. From where the routes down to the beach are marked, it is a descent of about 20 m in a rocky ravine, very easy and pretty nice.

It is not recommended with children or elderly people because of the access.

Swimming is not recommended with an easterly wind.

Cala de Enmedio

Between Agua Amarga and Mesa Roldán, it is a small cove with a small beach of about 100 m long and 20 m wide. To get there you can take two routes, both of which are marked with signs. The first one is a descent of about 20 m from the road, the second one is a descent of about 300 m. It is not accessible by car.

It is a very pretty place, with a small cove with a small pebble beach and very clear water. It is very easy and pleasant to no shade along the route.

It is highly recommended to visit because the cove by Agua Amarga is full.

Swimming is not recommended with an easterly wind.

Cala del Plomo

Halfway between Agua Amarga and Las Negras, on the road between the two, there is a sign that leads to a small descent (maximum 20 m) and there is a small beach of about 100 m long and 20 m wide. It is not accessible by car. In the waters, it is perfect for snorkeling near the rocks.

Put on your goggles and enjoy the exploration of the underwater world.

The beach is not one of the busiest beaches in the Park, it is very secluded and it can be difficult to park your car.

Swimming is not recommended with an easterly wind.

Cala de San Pedro

It is one of the beaches of Las Negras, it is a cove facing to the white sand and turquoise waters, for its vegetation and the surrounding cliffs, it is a place of great natural beauty. It is a small beach with a small pebble beach and very clear water. It is very easy and pleasant to no shade.

To reach it, you have to go on foot, taking a 4 km route from Las Negras, or by boat from the beach of Los Genoveses or from the port of Las Negras. It is highly recommended to do the route on foot, but it is relatively long, it is a route that goes through the steep slopes typical of the Cabo de Gata.

It is ideal for diving and snorkeling in the areas next to the mountain.

Sheltered from easterly winds (east).

Swimming is not recommended when the wind blows from the east.

Cala del Cuervo

Cala del Cuervo is a small cove, we have this beautiful cove with crystal clear waters where there is a whitish sand beach and a small rock. It is a place of great natural beauty, it is between Playa de Cala de San Pedro and Playa de Las Negras, it is a place with a lot of charm. From the cove you can take the tertulia path that goes to Las Negras, it is a route of 4 km, it is a relatively long route, it is highly recommended to do it because it is one of the very early hours of the day.

It is a place with no developed where the wind blows from the east and southeast.

El Playazo de Rodalquilar

Located on the Rodalquilar beach, it is a large stretch of fine sand and transparent waters, ideal for visiting with children, with a small pebble beach and very clear water, dotted with fishing, it is the most popular and accessible of all the ancient volcanic and the castle of San Ramón, the ruins of the mine and the village of Rodalquilar.

The beach has parking for cars and the small cove has the castle in the Bergantín cove (not good for bathing).

In the summer months it is very difficult to find the parking spots, it is a very popular place, it is very easy to get there by car in 1 or 2 km away. The walk is beautiful, although it is not recommended in the hottest days of the day.

It is highly recommended to walk from Cala del Carmen, it is a beautiful route, it is a route of about 3 km.

Bathing is not recommended in easterly winds (east).

Cala del Carnaje

Cala del Carnaje is a small cove where is the direction of Rodalquilar, the access road to the Cala del Carnaje is very difficult, it is a very steep and narrow road. The car park is very small and very difficult to park, it is very difficult to park a car in the parking lot, there is no space, it is formed by black stones rounded by the action of the sea, it is a place with very clear water.

You should take some bucklers with you to facilitate access to the cove.

It is ideal for snorkeling.

Swimming is not recommended when the winds are westerly or southerly.

Cala de los Toros

It is the most known beach in a cove delimited, passing the Arlanzón viewpoint, there is a small car park with a small pebble beach and very clear water, it is a cove shaped. The sand is black and full of stains, with scattering pink and gold. There. It is a small cove made of black and golden sand.

It is a cove that is very popular with tourists, exploiting it not recommended in windy days.

Los Escullos

Along the road that connects to Las Negras and Agua Amarga, there is a sign that leads to a small descent of about 300 m, there is a small beach of about 100 m long and 20 m wide, it is a place with very clear water and very pleasant, most of them of stone and little sand, it is very easy and pleasant to no shade, it is very popular with the people of the surrounding towns.

Swimming is not recommended with easterly winds.

Swimming is not recommended when the wind blows from the east.

Cala Higuera

This small and charming cove is located next to the village of San José. It is a small cove with sandy areas, so it is not the ideal beach for sunbathing in summer months, but it is a very pleasant place to take a walk and admire the beautiful landscape.

In summer it is very popular with diving schools, because it is a very suitable place for diving.

Next to the cove there is a restaurant with a large terrace overlooking the sea.

Playa de Genoveses

Genoveses beach, Playa de Los, is one of the most spectacular beaches in the Cabo de Gata-Nijar, with a very light colored sand where you can enjoy a real "beach" bathing, it is a very long beach, it is very easy to park and you can walk, you can get to Genoveses with the water taxi from the beaches of San José or Las Negras, in the summer there is weekend and with some old exceptions there, there is no road access to the beach of Genoveses.

During the summer months there is limited capacity for cars, it is very difficult to park a car, there is a car park with a capacity for 50 cars and the rest of the cars must be parked on the roadside, it is very difficult to park a car in the scenery.

Not known for surfing or windy days.

Swimming is not recommended with easterly winds.

Leaving the beach where the car was have passed the Mirlo de Genoveses, you can access a series of small coves with pebbles and very clear water, Cala Chica, Cala Primera, Cala Chica, Playa del Mirlo.

Playa de Mónsul

The access to the same as Genoveses, it is the next big beach, it can also be accessed by foot from the water taxi.

It is the most cinematographic beach of Cabo de Gata, it has been used in many movies, it is a very long beach with very clear water, it is a beach with a very wide sand area with a large dune behind it and very fine white sand. It is very photographic.

It is affected by easterly and southerly winds.

Cala de la Medialuna

Next to the beach of Mónsul, and the bay of Cala de Sabinar, this hidden cove, it is the heart of the area of maximum interest for snorkeling and diving, its waters and its seabed are incredible.

It can be reached by car along the road from the Cabo de Gata to the Sabinar, it is a very pleasant walk, it is one of the organized as part of the route, from the time spent in it on foot by from there the access is on foot through a path that goes through the mountain and the access to the beach is very difficult, it is recommended for children and the elderly.

Swimming is not recommended when the wind is from the east.

Cala Rajá

Cala Rajá is one of the beaches of Cabo de Gata, like this hidden cove, it is in the heart of the area of maximum interest for snorkeling and diving, its waters and its seabed are incredible.

It can be reached by car along the road from the Cabo de Gata to the Sabinar, it is a very pleasant walk, it is one of the organized as part of the route, from the time spent in it on foot by from there the access is on foot through a path that goes through the mountain and the access to the beach is very difficult, it is recommended for children and the elderly.

Swimming is not recommended when the wind is from the east.

Cala Arena

This small cove is ideal for enjoying a day on the beach and bathing in crystal clear waters, it is a small cove very close to the lighthouse of Cabo de Gata and the beach of Los Genoveses, it is a small cove with a small sand beach. To get there you must take the coastal path to the lighthouse and, a few metres before to the lighthouse, there is a sign that leads to a small path of 300 m long in the direction of the cove, it is a very short path, it is very easy to access, it is a very pleasant path. From there, access to the cove is on foot. The slope is very gentle and very easy.

Throughout the area there are different beaches where you can sail or have a drink or a terrace.

A must: stop at one of the first observatories on the road to Cabo de Gata and enjoy the Kangaroo, the Kangaroo Rock.

Swimming is not recommended when the wind is from the east.

Playa del Corralete

Located next to the Cala de los Genoveses, very close to where the area where the Image Marine Reserve is located, it is a very small beach with very clear water, very suitable for snorkeling with the family.

It is advisable to leave beaches, as there are many centres in the area.

Swimming is not recommended in east and south winds.

Playas desde el pueblo del Cabo de Gata at Faro

The group of beaches located from the village of Cabo de Gata to the lighthouse and covers an extension of approximately 2 km, it is made up of the beaches of Playa de la Fábrica, Playa de Los Genoveses, Playa de Los Genoveses, Playa de Los Genoveses

ROUTES

La Molata

This path links Cala del Cuervo with the Playazo of Rodalquilar. It is a short and accessible route for all ages, it runs along the hill of La Molata, where you can observe the great geological and biological wealth of Cabo de Gata and some of the ancient defensive fortifications of the coast.

THE ROUTE

Cinto Hill

During this route, which starts at the old mining installations of Rodalquilar, you will discover an authentic mining landscape full of a thousand colours.
Its surroundings and its vegetation are very special, it does not leave you indifferent.

THE ROUTE

San Pedro - El Plomo - Agua Amarga

It is a long and relatively difficult route, but it is worth doing at least part of it to discover the landscapes of this unspoilt area of Cabo de Gata. Steep cliffs with abundant vegetation, a crystalline sea and a series of beautiful coves where you can bathe.

THE ROUTE

Escullos - Isleta del Moro

This is a short, very pleasant route that links the beach of Arco de los Escullos with the village of Isleta del Moro. Along the path you will discover a seascape of volcanic cliffs and some completely unspoilt coves.

THE ROUTE

White Sail

The route runs along part of the Cerro de la Vela Blanca, an area of high ecological value. On one side, the virgin area of the Terrestrial Reserve and, on the other, the Integral Marine Reserve. The vegetation, the profile of the coast, the blue of the sea and its small coves are surprising.

THE ROUTE

Las Amoladeras

This circular path starts at the car park of the Amoladeras Visitor Centre, goes through an area of coastal dunes, a stretch of mountain range, the Amoladeras viewpoint and a last steppe area before arriving. It is an ideal trail to discover the varied mosaic of landscapes that make up Cabo de Gata.
