

WECAMP CALA MONTGÓ PRESS

WE CAMP

**wecamp Cala Montgó,
nature, sea, and
tranquility on the Costa
Brava.**

**We bring the hotel
experience to camping
in a concept of design,
comfort, and outdoor
sustainability.**

welcome outsiders

**WECAMP
MORE THAN JUST
A CAMPSITE**

Where the mountains touch the sea, Cala Montgó is wecamp's destination of calm waters surrounded by the Empordà forest. A next-generation proposal with minimal environmental impact and respect for the community, resulting in comfort in a natural setting.

Cala Montgó is a well-known secret. Recognized as one of the most natural, family-friendly, and peaceful coves, it has been awarded the European "Blue Flag" for the quality of its golden sandy beach and marine life.

This privileged enclave is located near **L'Escala, Sant Martí d'Empuries, Castell de Montgrí, and Sant Pere Pescador**, protected from the "tramontana" wind by the presence of the Montgrí mountain range. A mountainous area with flora, dunes, and fauna that shapes the emblematic **Camí de Ronda**. This path runs along the Costa Brava, allowing visitors to explore the historical culture of the Mediterranean or enjoy water activities.

The town of L'Escala has a long tradition in the anchovy industry. Over the years, the production has remained artisanal, using completely natural products, which has earned them an excellent reputation worldwide. Therefore, it is recommended to visit one of the anchovy factories in the area to learn how the anchovies of L'Escala are prepared today.

THE CAMPING THAT EMBRACES THE STYLE OF ALT EMPORDÀ

Cala Montgó has been designed by the architecture and interior design studio **RRIO / EXEDRA** and the landscape proposal by **Valentina Greselin**. The camping offers a fusion of **design and comfort with the environment**, welcoming those who seek more than just a camping experience.

All the buildings in Cala Montgó follow an Empordà style with an architectural style of the 'masía' type with ceramic and wood finishes for a rural and harmonious result.

The interior **ambiance of the buildings** is decorated in light tones, creating spaciousness. Materials such as wood, stone, and rustic ceramic floors provide a cozy atmosphere that blends with the landscape.

The furniture is functional, comfortable, and of contemporary design. All the furniture features straight and simple lines, with summer colors such as green, reddish, or pumpkin, creating a cheerful and harmonious atmosphere.

As an added value, all accommodations guarantee the comfort of a hotel, with high-quality beds, amenities, sheets, towels, and room service. In addition to numerous **common areas** that cater to the needs of families, couples, and groups.

The highlight is the **pool with a solarium** surrounded by greenery that envelops the El Salat Restaurant, offering Mediterranean cuisine with fresh products from the Costa Brava. There is a spacious indoor dining area with a terrace overlooking the pool for enjoying summer evenings.

wecamp Cala Montgó offers other areas dedicated to sports and leisure, such as the kids' club, coworking space, sports court, minigolf, and massage room.

THE NATURAL OASIS FOR ALL TRAVELERS

Guest comfort is wecamp's main objective, so they provide various services such as buggies, laundry, supermarket, and water fountains. Alongside recycling points, they achieve the desired duality in wecamp, between consumption and ecology; sustainability.

Kids Club Masia.

wecamp Cala Montgó has a beautiful space where free activities are organized for children and families. Fun and sustainable activities for an even more enjoyable wecamp-style stay.

Espacio de Co-Working.

Equipped workspaces with Wi-Fi, air conditioning, and contemporary furniture. It's the perfect break for remote workers.

Zona Deportiva.

The camping has a sports court and mini-golf. They also manage e-Bike and Mountain Bike rentals and water experiences to enjoy the surrounding nature.

Servicios para Autocaravanas.

For the more authentic campers, exclusive services are available for them, including camper clean, electricity and water supply, and renovated sanitary facilities with sinks and washbasins.

Guest comfort is wecamp's main objective, so they provide various services such as buggies, laundry, supermarket, and water fountains. Alongside recycling points, they achieve the desired duality in wecamp, between consumption and ecology; sustainability.

ACCOMMODATIONS FOR THE GLAMPING EXPERIENCE

30 Mobile Home.

31 Bell Tent y Bell Tent +.

The bell-style tent for up to two or three people, which stands out for its brightness, height, ventilation, and permeability. Its infrastructure includes a wooden platform to enjoy as a terrace. And its interior houses a spacious and versatile atmosphere.

MORE THAN A MERE TOURIST

The Alt Empordà is known for offering a myriad of outdoor experiences and activities. All of them, gathered in the Local Guide and in its own App for free, will make you live the authentic local experience of belonging to the place you are visiting.

SANT MARTÍ D'EMPÚRIES, A GRECO-ROMAN SETTLEMENT BY THE BEACH

A few kilometers from Cala Montgó, you will find the medieval settlement of Sant Martí d'Empúries and its Greco-Roman archaeological site. Two essential places to visit when exploring the elegant and wild Costa Brava

EXPLORE THE ROUTES OFFERED BY EMPORDÀ

If you are looking for a simpler plan, you can embark on a route on your own with your group or family. There are more cultural destinations, such as the Ruins of Empordà, other more sports-oriented routes such as the Vía Verde, and some calmer ones like the Camino de Ronda.

WATER ACTIVITIES IN THE MEDITERRANEAN

Water activities such as kayaking, paddle surfing, windsurfing, or snorkeling are some of the options offered by the Catalan coast, thanks to its tranquil waters and quality marine reserves. Sailing is an experience that will allow you to get to know the landscapes and customs of the place from a different perspective. In addition, wecamp offers boat trips that can be booked through the App, website, or reception.

HIKING AND BICYCLE ROUTES ALONG THE BEST CALAS OF THE COSTA BRAVA

Cala Montgó is characterized by its infinite paths and corners full of protected fauna and flora. All of them invite you to explore the coastal path through the Camino de Ronda. The journey includes imposing limestone cliffs, coves, and caves that perfectly represent the essence of the term "Costa Brava."

AS GREEN AS POSSIBLE

Under the motto "**As green as possible,**" the green constructions support the **United Nations' 2030 Sustainable Development Goals**, a plan driven by the United Nations that wecamp fully embraces. Therefore, Cala Montgó is built on three key pillars: **design, comfort, and sustainability.**

Investing in eco-technology, promoting sustainable experiences, fostering responsible consumption, recognizing diversity, supporting local producers are some of wecamp's tasks for a sustainable and prosperous future.

To achieve this, they have collaborated with experts in **energy efficiency** who have worked to use natural and modern materials, with the aim of reducing the carbon footprint and prioritizing the use of products and services from the area to perpetuate each location's tradition.

There are other practices that align with the sustainability of the camping, such as the use of recycled elements in construction. Moreover, they have a selective recycling system throughout the campsite, including accommodations equipped with bathrooms and kitchens.

On the other hand, all common buildings are powered by aerothermal systems with **solar panel** support. The camping's lighting is LED to reduce energy consumption. They have also established a **system for rainwater harvesting for irrigation and other water-saving elements**, such as low-flow toilets or aerators at terminal points.

The minimal intervention is evident in wecamp's landscaping project, protecting the habitat's biodiversity through the installation of 17,506 plant species.

In addition, digital innovation is at the heart of all projects and services. An example of this is their own virtual space or **App**, which contributes to reducing environmental waste.

Finally, as part of their commitment to **sustainable mobility**, they have a fleet of electric buggies and an exclusive charging station for them.

For all these reasons, wecamp Cala Montgó is Biosphere Committed.
