

WECAMP CALA MONTGÓ PRESS

WE CAMP

**wecamp Cala Montgó,
nature, sea and
tranquillity on the Costa
Brava.**

**We transfer the hotel
experience to the
campsite in a concept
of design, comfort and
sustainability in the open
air.**

**WECAMP MORE
THAN JUST A
CAMPSITE**

Where the mountain comes to touch the sea, Cala Mongó is the wecamp destination of calm waters surrounded by the Empordà forest. A new generation proposal, and minimal intervention with the environment, where respect for the community results in comfort in a natural environment.

Cala Montgó is an open secret. Recognised as one of the most natural, family-friendly and peaceful coves. It has received the European 'Blue Flag' award for the quality of its golden sand and lively seabed.

A privileged enclave located in the vicinity of **l'Escala, Sant Martí d'Empuries, Castell de Montgrí and Sant Pere Pescador**, protected by the 'tramontana' wind thanks to the presence of the Montgrí mountain range. A mountainous area of flora, dunes and fauna that outlines the emblematic **Camí de Ronda**. This is the path that runs along the Costa Brava, through which you can get to know the historical culture of the Mediterranean or enjoy water activities.

The town of l'Escala has a long tradition in the anchovy industry. Over the years, the anchovies have been produced using traditional methods and completely natural products, a fact that has earned the town an excellent reputation worldwide. It is therefore recommended that you visit one of the local anchovy factories to find out how anchovies from l'Escala are prepared today.

THE CAMPSITE THAT REIVINDICATES THE STYLE OF THE ALT EMPORDÀ

Cala Montgó has been designed by the architecture and interior design studio **RRIO / EXEDRA** and the landscaping proposal by

Todos los edificios de Cala Montgó, persiguen un estilo ampurdanés con un estilo arquitectónico tipo 'masía' de acabados en cerámica y madera para un resultado rural y armonioso.

Valentina Greselin to give birth to a camping proposal where **design and comfort go in fusion with the environment**, to welcome those who are looking for something more than a campsite. for the **interior environment of the buildings**, we have opted for a decoration in light tones that creates spaciousness. In addition to materials such as wood, stone, ceramics with rustic floors for a cosy result that blends in with the landscape.

As for the furniture, the aim is for it to be functional, comfortable and contemporary in design. So all the furniture is composed of straight and simple lines, in summery tones such as green, reddish or pumpkin, to create a cheerful and harmonious atmosphere.

As an added value, all the accommodation offers the guaranteed comfort of a hotel with high quality beds, amenities, sheets, towels and room service. In addition to numerous **common areas** that meet the needs of families, couples and groups.

The **swimming pool with solarium** surrounded by vegetation surrounds the Restaurant El Salat, Mediterranean cuisine with fresh products from the Costa Brava. A large indoor dining room with a terrace overlooking the pool to enjoy summer evenings.

wecamp Cala Montgó offers other areas for sport and leisure, such as the kids club, coworking room, multi-sports court, mini-golf and massage room.

THE NATURAL OASIS FOR ALL TYPES OF TRAVELLERS

All wecamp accommodations have the basic materials for the experience, such as crockery, fridge, microwave, towels and air conditioning or ventilation system. There are also common areas for all travellers to find their place and thus encourage interaction between guests and with nature.

Kids Club Masia.

wecamp Cala Montgó has a beautiful space where free activities for children and families are organised. Playful and sustainable activities for everyone to have fun in the wecamp style for a more enjoyable stay.

Co-Working Space

Work areas equipped with Wi-Fi, air conditioning and contemporary furniture. It is the best break for remote workers

Sports area.

The campsite has a multi-sports court and mini-golf. We also manage the rental of e-Bike and MTB bikes and water experiences to enjoy the surrounding nature.

Services for Motorhomes.

For the more authentic campers, there are services exclusively for them. These include camper cleanliness, electricity and water supply, and sanitary facilities, including fully renovated sinks and washbasins.

The comfort of the guests is the main objective of wecamp. For this reason, various services such as buggies, laundry, supermarket and water fountains are provided and included. Together with the recycling points, the desired duality between consumption and ecology - sustainability - is maintained at wecamp.

ACCOMMODATION FOR THE GLAMPING EXPERIENCE

30 Mobile Home.

With a capacity for more than 6 people, this is the comfortable and versatile option for larger groups. Consisting of a double room, two other beds and a sofa that converts into a bed, this type of room stands out for its organised infrastructure, spacious atmosphere, equipped kitchen and other comforts.

9 Mobile Home Basic Couple

One-bedroom accommodation. It has a terrace with an outdoor furnished porch with shade. It is equipped with a kitchen with hob, microwave, fridge, kitchenware and cutlery. Bathroom with small bath, shower, WC, towels and bed linen.

7 Mobile Home Basic Family.

Ideal for families or groups with a maximum capacity of 5 people. It is the safe bet if what you want is to merge with the outdoors, thanks to its fully equipped outdoor terrace, and enjoy the space.

29 Mobile Home Basic Family Compact

Consisting of a main double bedroom and a sofa that converts into a bed, this is the accommodation, for three people, that will allow you to connect with the local vegetation and the breeze from the Empordà sea, thanks to a fully equipped terrace.

6 Mobile Home Couple+.

One-bedroom accommodation, with a double bed. It has a terrace with an outdoor furnished porch with shade. It is equipped with a kitchen with hob, microwave, fridge, kitchenware and cutlery. Bathroom with small bath, shower, WC, towels and bed linen.

7 Mobile Home Wood

Wooden accommodation for four people consisting of a main double bedroom and two single beds. An accommodation designed to connect with the outdoors, thanks to its fully equipped outdoor terrace.

53 Bungalow Duplex.

A stay for four people with all the comforts and services in a natural setting surrounded by forest and pine trees. A bright and relaxed space that ensures relaxation in a home with a holiday atmosphere.

37 Cabin Tent.

With a capacity for three people, it is the classic gabled tent in its most modern version. With a versatile interior design, made up of natural textures and light colours, its spacious triangular structure opens its doors to a serene terrace.

31 Bell Tent and Bell Tent +.

The bell-style tent, for up to two or three people, stands out for its luminosity, height, ventilation and permeability. Its infrastructure includes a wooded platform to enjoy as a terrace. And its interior houses a spacious and versatile atmosphere.

MORE THAN JUST A TOURIST

The Alt Empordà is known for offering a host of outdoor experiences and activities. All of them, collected in the Local Guide and in its own App for free, will make you live the authentic local experience of belonging to the place you are visiting.

SANT MARTÍ D'EMPÚRIES, A GRECO-ROMAN SITE ON THE BEACHFRONT

Just a few kilometres from Cala Montgó is the medieval settlement of Sant Martí d'Empúries and its Greco-Roman site. Two essential places if you visit the elegant and untamed Costa Brava.

A WALK ALONG THE ROUTES OFFERED BY THE EMPORDÀ

If you are looking for a simpler plan, you can take a route on your own with your group or family. There are more cultural destinations such as the Empordà Ruins, other more sporty routes such as the Vía Verde, and some quieter ones such as the Camino de Ronda.

NAUTICAL ACTIVITIES IN THE MEDITERRANEAN

Water activities such as kayaking, paddle surfing, windsurfing or snorkelling are some of the options offered by the Catalan coastline due to its calm waters and the quality of its marine reserves. Sailing is an experience that will give you a different perspective on the landscapes and customs of the area. In addition, wecamp offers boat trips that can be booked from the App, website or reception.

HIKING AND CYCLING ROUTES ALONG THE BEST COVES OF THE COSTA BRAVA.

Cala Montgó is characterised by its infinite footpaths and corners full of protected fauna and flora. All of them invite you to follow the coastal path along the Camino de Ronda. The crossing is home to imposing limestone cliffs, coves and caves that represent very well what the term 'Costa Brava' means.

AS GREEN AS POSSIBLE

Under the slogan '**As green as possible**', green buildings are committed to the **2030 Sustainable Development Goals**, a plan promoted by the United Nations and which wecamp has adopted as its own. Cala Montgó has been built on three key pillars: design, **comfort and sustainability**.

Investing in eco-technology, fostering sustainable experiences, generating responsible consumption, recognising diversity, supporting local producers, are some of wecamp's tasks for a sustainable and prosperous future.

To this end, **energy efficiency** experts have collaborated to use natural and modern materials, with the aim of reducing the carbon footprint and prioritising the use of local products and services to perpetuate the tradition of each enclave.

There are other practices that are in line with the sustainability of the camp, such as the use of recycled elements in the construction. In addition, a selective recycling system is in place throughout the site, including the accommodation equipped with bathroom and kitchen.

On the other hand, all the common buildings are powered by aerothermal systems supported by **solar panels**. And the lighting in the campsite is **LED**, in order to reduce energy consumption. A system has also been set up to **use rainwater for irrigation** and other water-saving elements, such as low-consumption toilets and sprinklers at terminal points.

Minimal intervention is expressed through wecamp's landscaping project, which protects the biodiversity of the habitat with the installation of 17,506 plant species.

Digital **innovation** is also at the heart of all projects and services. An example of this is its own virtual space or **App** that contributes to reducing environmental waste.

Finally, as part of its commitment to **sustainable mobility**, it has a fleet of electric buggies and a charging station exclusively for them.
